

SEATING

Introduction

The majority of office workers spend more time sitting at their desk than they do at home. For this reason, it is vital that the correct office seating is selected, ensuring user comfort throughout the working day.

Our selection of seating, sourced from pre-eminent manufacturers, includes a wide range of task and operator options to ensure that you can make the right choice. Also included is a range of specialist seating for any user with specific needs.

However, seating within the office environment isn't confined to those options used at the desk. Our offering also contains visitor, meeting, training and beam seating to ensure that all areas of the environment are catered for. And the choice doesn't end there...

We also feature a wide selection of bistro, breakout and restaurant options to ensure that personnel enjoy comfortable rest breaks too.
